The End of Term Exam is made up of three sections.

Part 1

Part 1 of the Reading Summative Assessment is a narrative text. The purpose of a narrative text is to entertain rather than inform. It can be a literary text, involving a story written from either a first- or third-person perspective. This text type is characterised by informal language, direct speech, characters and plot.

- 8 multiple-choice questions

5. When do the family have breakfast?
A before they go for a walk
B after they finish their walk
C during their morning walk

Part 2

Part 2 of the Reading Assessment is an informative text. This text type's purpose is to impart information and it has a lot of facts. The language used can be informal (blog posts, for example, can be informative texts) or formal (newspaper articles or academic journals can also be informative texts). Informative texts can be written from a first-person perspective (blog posts and reports, for example) or can be formal and impersonal (articles).

- 8 multiple-choice questions

5. What is the best way down the mountain?
A hiking
B helicopter
C toboggan

Part 3

Part 3 of the assessment is a MAZE. This is a short informative text with nine gaps in the sentences that assess students' proficiency in level-specific grammar, functional language and lexis. This assessment type is called a MAZE because it is a textual maze. Students need to be able to make the right 'turns' within a short text by selecting the correct word or words to complete sentences. It requires students to make connections between different parts of a text and apply their skills and knowledge in an integrated, authentic way.

We can use microscope which can helps me to see the plants cells. The microscope is useful because it makes things appear bigger. I'm very clever I discovered a plant which can cure the headache sickness.

B-Waleed

I'm professor Zainab I study new medicine. I'm hardworking because I always work in the laboratory. I must observe different medicines. This job makes me happy because medicine makes people feel better when they are sick. Medicine can be passed into the blood, and it is important to do experiments on new medicine to protect peoples lives.

C-Maher

I'm professor Salem I'm an engineer scientist. I spend most of the time working outside because I have to check the buildings or bridges . I need to use machines and study how they work , so the worker can use them for building roads .

1- His work to study machines and buildings ……

2- He feels happy when people get better……

3- He is interested in medicine……..

4- She discovered a medicine for a headache. …….

5- She use microscope to see the leaves and roots……

6- He is not an engineer scientist because she works with plants……..

7- doing experiments on medicine is needed because it can be passed into the blood……

6-He is an engineer scientist ……..

This is a MAZE 1 (text / texting / texts). It has gaps that students 2 (have to / don't have to / might) fill by choosing the correct 3 (grammer / grammar / gramar), functional language or vocabulary point. It is an efficient method of testing students 4 (due to / but / because) it allows testing of multiple different elements of language in a single 5 (assessement / assessment / assessment). It is also quite cognitively 6 (demanding / demand / demanded) as students may need the context of sentences around the one with the gap 7 (in respect of / in order to / in connection with) answer correctly.

Sleep Scientists

Sleep scientists find out what happens to people when they don't get enough sleep. They collect information about how much sleep people need. This helps to keep people safe when they are doing important jobs, like doctors, firefighters .and police officers

Sleep scientist use people called "testers" to help study sleep. The testers don't sleep in their homes. They sleep in laboratories, and have special machines attached to them. The scientists watch them sleep all night. The machines give the scientist information about how well the person is .sleeping

Before the testers go to sleep, the scientists have them do a test on a computer. The testers fall asleep at midnight. At 4 o'clock in the morning, they wake up to do another test on the computer. Five hours later, the testers do another test on .the computer

The testers stay awake all day until midnight. It's very hard for .the testers to stay awake so long

Sleep scientists collect information .1 ._____ about

- .a keeping people safe
- .b important jobs
- .c how much sleep people need

.____ The scientists ask the testers to sleep in .2

- .a their homes
- .b the laboratory
- .c the machine

The experiment has .3
._____ computer tests

- three .a
- four .b
- five .c

Testers go to bed and .4
._____ start sleeping

- at midnight .a
- hours later 5 .b
- o'clock in the 4

._____ This text might be most useful to someone who .5

- likes doing computer tests .a
- is interested in studying science .b
- wants to know what a sleep scientist does .c

Part 2

Frida Kahlo

My name is Alia and I am going to talk about a person I admire, Frida Kahlo. She is famous for her paintings. Nature and the things around her gave her the ideas for her .paintings

Frida Kahlo was born in Mexico in 1907. Her parents had 4 girls and were very kind and respectful people. She was a .friendly, but unhappy child

At 18, she was in a bad accident. She was riding in a bus that crashed into a tram. She could not walk for a while .and had to spend a lot of time in hospital

Before her death in 1954, she had made more than 140 different paintings. Fifty-five were beautiful paintings of .herself

Before her death in 1954, she had made more than 140 different paintings. Fifty-five were beautiful paintings of .herself

Part 3

In the Desert

Last week, we went camping in the desert for a night. We made a big fire. We ate lots of delicious food and talked. After dinner, everyone was tired but I wanted to have fun in the desert. My father said, "It is not safe to go alone, go to sleep".

But I did not sleep. I ran in the sand. I looked for scorpions under rocks, but there were none. So, I looked at the stars in the sky and saw a bright shining star. I heard a bird. Then it was time to go back.

I looked for our tents but could not find them. I could hear strange noises and my legs were tired. I was lost in the desert, so I felt anxious.

Just then, I heard my father calling me. My father said, "You should be more sensible," and gave me a big hug. I learned that I should always listen to his advice.

Doctor Yamanka is from Japan. He is a Doctor of Medicine as well as a scientist. He studies the body which is made up of millions of tiny things called cells. Doctor Yamanka's work looks at types of cells in the body that can change what they do. These cells can change from being skin cells on your arm to cells that make up your heart, or any other part of your body. In 2012 he won the Nobel Prize for Medicine. His research could help people in the future who are sick or hurt.

B

Doctor Sebgupta is from America. She is a space scientist and engineer at Nasa, in America.

She makes engines for spaceships and works on how to help spaceships get down out of space. She made a parachute to help a robot stop on Mars. In 2006 she won a prize for Woman Engineer of the year. Dr. Sengupta's work could help to make space travel easier.

1- There was a parachute made by her .....

2- This invention was able to stop on Mars.....

3- He won the Nobel Prize.....

4- She works in Nasa. .....

5- He knows about medicines.....

6- She is interested to make engines for spaceships.....

7- Sengupta's work helped her to won a prize.....

Hello my name is Saeed. I live in a big eco house with my family. It has big windows. It has solar panels on the roof. Solar panels are made of many solar cells, which are made of silicon. The panels should be connected. As the sun releases sunlight, the panels can use it to generate electricity. I feel that solar panel is the most important scientific invention because it can protect our environment. I love it because we use little electricity in our house. It is safe and healthy because it reduces the carbon footprints. My parents are satisfied because they can save a lot of money.
