

Three-Dimensional Thinking

1. Make a model of a landscape. Include the landforms in the photos below.

plain

mountains

2. Would a valley be found in the landscape you modeled? Explain.

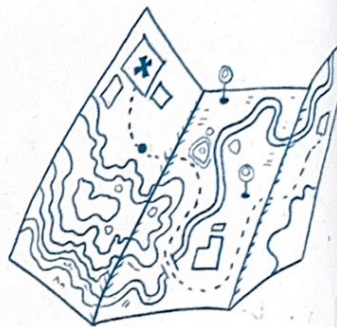

A valley would be found
in low area between the
mountains.

Extend It

Become a tour guide. Plan a trip to teach tourists about three different landforms.

Research places that have the landforms you chose. Plan your trip below. Write what you will teach the tourists about each place.

Draw and label the landform in each place.

Title of Trip: _____

Place 1: _____

mountains are very
high land.

Place 2: _____

plains are meadows
and flat land.

Place 3: _____

island is land

surrounded by
water.

KEEP PLANNING

STEM Module Project
Science Challenge

Now that you have learned what kinds of land you can find on Earth, go to the Module Project Planning pages.
